

CloudSync — Company Overview & Pricing

About CloudSync

CloudSync is a file synchronization and collaboration platform founded in 2019. The product helps distributed teams keep documents, design files, and project assets in sync across devices in real time. CloudSync serves over 12,000 businesses worldwide, ranging from small startups to enterprise organizations with thousands of employees.

Core Features

The platform offers real-time file synchronization, granular permission controls, version history with unlimited rollbacks, and end-to-end encryption for all stored data. CloudSync also integrates natively with popular tools such as Slack, Google Workspace, and Microsoft 365, allowing teams to trigger sync workflows directly from the tools they already use every day.

Security & Compliance

CloudSync is SOC 2 Type II certified and GDPR compliant. All customer data is encrypted at rest using AES-256 and in transit using TLS 1.3. Enterprise customers can additionally request a dedicated single-tenant deployment with custom data residency options in the US, EU, or APAC regions.

Pricing Plans

CloudSync offers four pricing tiers designed to scale from individual users to large enterprise teams. Each tier increases the number of allowed users and unlocks additional administrative and security controls.

Plan	Price	Users
Free	\$0	1
Pro	\$20	5
Team	\$50	20
Enterprise	\$200	100

Support

Free and Pro plan customers get access to email support with a 48-hour response time. Team plan customers receive priority email and chat support. Enterprise customers are assigned a dedicated customer success manager and get a guaranteed 1-hour response time for critical issues, along with quarterly business reviews.
